PROGRESS REPORT

Your progress, in full detail

19-23 Oct 2026

Generated 10/23/2026, 8:59:32 PM

TASKS COMPLETED	COMPLETION RATE	FOCUS TIME	ACTIVE DAYS
5	63%	2h 36m	4/5
of 8 due this period	5 of 8 due	5 sessions	previous 2/5

AT A GLANCE

5 of 8 tasks completed (63%); 67% the previous week. 2h 36m focused across 5 sessions, averaging 31m (previo 30m). Active on 4 of 5 days; best run 4 days from Oct 20.

Generated locally in your browser from the records stored on this device.

Nothing was uploaded; every figure matches the YumeRise Progress screen for this period.

1 Executive summary

TASKS COMPLETED	COMPLETION RATE	FOCUS TIME
5	63%	2h 36m
of 8 due this period	5 of 8 due	5 sessions

AVG FOCUS / DAY	ACTIVE DAYS	AVG SESSION
31m	4/5	31m
per calendar day	previous 2/5	per recorded session

- 5 of 8 tasks completed (63%); 67% the previous week.
- 2h 36m focused across 5 sessions, averaging 31m (previous period: 2h 30m).
- Active on 4 of 5 days; best run 4 days from Oct 20.
- 1 active goal, averaging 40% progress.
- Planned 5h 45m against 2h 36m actually focused.
- All figures are computed from the records on this device by the same engine as the Progress screen.

2 Productivity overview

Completion of tasks due in this period

63% complete 5 of 8 due

Completion was 63% versus 67% the previous week - down 4 percentage points.

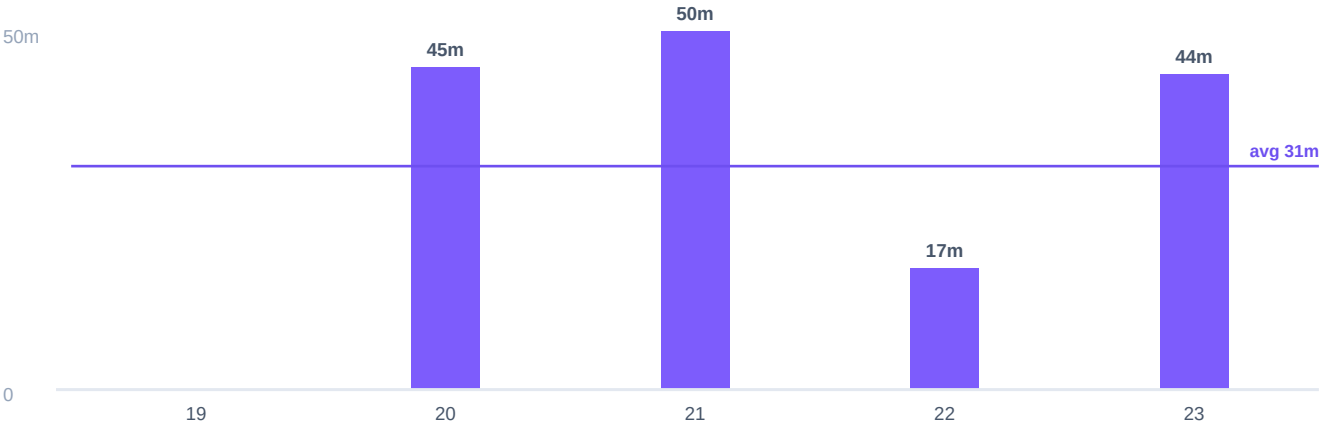

Due per priority

3 tasks from this period remain open; 5 were completed.

3 Focus analysis

SESSIONS	FOCUS TIME	AVG SESSION
5	2h 36m	31m
recorded this period	previous 2h 30m	per recorded session

- 2h 36m recorded in 5 sessions across 5 days (31m per calendar day).
- Fullest day: Oct 21 with 50m focused.
- The previous window held 2h 30m - an increase of 6m.

4 Goals and planning

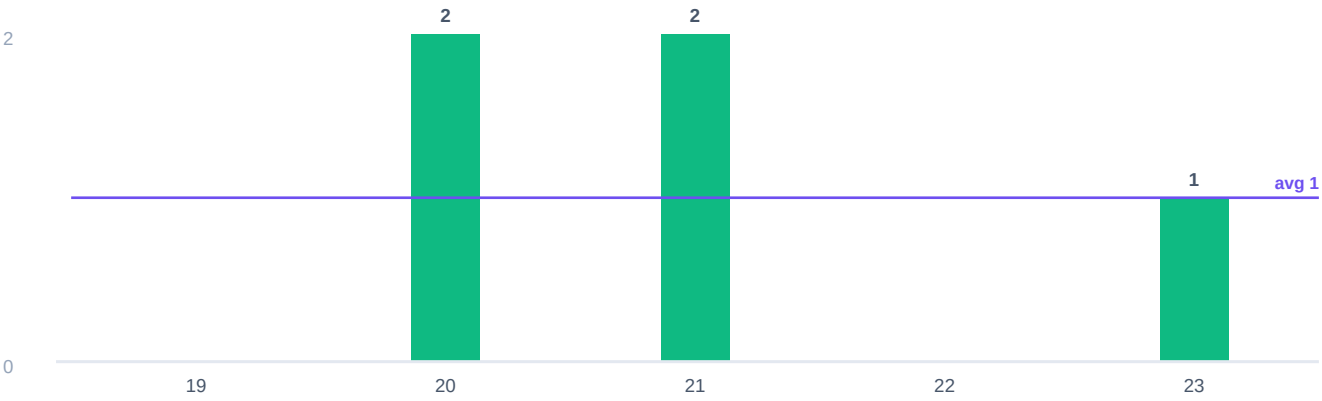

1 active goal, averaging 40% progress. Goals keep current state only - there is no goal history to chart.

Run 10 km 40%

4 / 10 km

Planned time: 5h 45m against 2h 36m focused - 3h 9m of planned time was not focused.

5 Historical trends

ACTIVE DAYS	BEST RUN	LONGEST QUIET STRETCH
4/5	4 days	1 day

- Most tasks completed on Oct 20 (2).
- Best run began Oct 20.
- Longest quiet stretch: Oct 19 Oct 19.
- Previous window: 2 completed, 2h 30m focused - this window 5 completed, 2h 36m focused.

6 Methodology and data notes

- Reporting period: 19-23 Oct 2026 - 5 calendar days, grouped by day (5 buckets). Generated 10/23/2026, 8:59:32 PM.
- Source: the tasks, focus sessions, goals and plan blocks stored in this browser (IndexedDB) by YumeRise Next, analysed by

the same engine that renders the Progress screen. The PDF was produced locally; no data was sent to any service.

- Definitions - due: tasks dated inside the period; completion: completed ÷ due; focus time: the sum of each recorded session's actual minutes, counted on the local day of its start; active day: at least one task completed or one focus minute; planned: minutes in plan blocks and scheduled tasks, counted once; averages are per calendar day.

- Comparison: figures are compared against the previous week, which contains recorded activity.

- Limitations - goals store current progress only (no history), so goal trends are not shown; focus time counts recorded sessions only, so untracked focus is invisible; sessions under one whole minute are not recorded; this report reflects data as of the generation date above.

- This PDF contains selectable text, so it can be pasted or uploaded into tools like ChatGPT for further analysis.
